SUMMARY

Full Stack Software Engineer delivering end-to-end systems from UX and architecture to production deployment. Shipped a field service platform replacing a \$300/mo SaaS tool, drove 300% revenue growth with a custom booking and CMS platform, and consistently owned the full software development life cycle solving complex problems.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: Next.js, React, Redux, Tailwind CSS, Axios, Motion

Backend: Express, Node.js, Prisma ORM, PostgreSQL, MongoDB, MySQL

Tools: Git, GitHub Actions, Postman, Figma, Vercel, Heroku, Notion

EXPERIENCE

Liftmark

Jun. 2025 – Present

Full Stack Software Engineer - Freelance

Modesto, CA

- Replaced a \$300/mo third-party SaaS tool by architecting and shipping a full multi-tenant field service platform handling scheduling, dispatch, CRM, invoicing, payments, and customer workflows end-to-end.
- Built scalable backend systems with Express, PostgreSQL, and Prisma ORM enabling role-based access control, operational event tracking, and audit logging across all user tiers.
- Reduced software and administrative costs by approximately \$5k annually by consolidating multiple third-party tools into a single unified platform.

Duct Daddy

Sep. 2024 – May 2025

Full Stack Software Engineer - Contract

Remote

- Drove a 300% revenue increase within 6 months by designing and shipping a custom CMS and service booking platform for a growing home services business.
- Enabled non-technical staff to manage content independently by architecting scalable CMS workflows for dynamic marketing pages, blog publishing, and operational updates.
- Improved lead capture and service request conversion by building intake and booking flows using Next.js, MongoDB, and Node.js.

Bay Valley Tech

Mar. 2024 – Sep. 2024

Software Engineer Intern

Modesto, CA

- Built reusable responsive UI components and multi-device navigation systems for a full-stack social media platform improving usability across desktop and mobile.
- Collaborated within an Agile/Scrum environment with daily standups, code reviews, and presentations to the organization's board gaining hands-on professional SDLC experience.
- Integrated frontend with RESTful APIs using Axios to enable authentication, routing, and dynamic data rendering across the platform.

EDUCATION

Bay Valley Tech Computer Programming

2022 - 2024
