SUMMARY

Full Stack Software Engineer experienced in building and shipping production SaaS platforms and operational business systems end-to-end. Developed scalable applications spanning scheduling, dispatching, CRM, invoicing, payments, and workflow automation. Comfortable owning the SDLC from system design and UX to backend architecture and deployment.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: Next.js, React, Redux, Tailwind CSS, Axios, Motion

Backend: Express, Node.js, Prisma ORM, PostgreSQL, MongoDB, MySQL

Tools: Git, GitHub Actions, Postman, Figma, Vercel, Heroku, Notion

EXPERIENCE

Liftmark

June 2025 – Present

Full Stack Software Engineer Freelancing

Modesto, CA

- Reduced tool sprawl and administrative overhead by consolidating scheduling, dispatching, CRM, invoicing, payments, and customer workflows into a single multi-tenant field service platform.
- Enabled role-based workflows, operational event tracking, and audit logging by architecting scalable backend systems with Express, PostgreSQL, and Prisma ORM.
- Cut software and administrative costs by approximately \$5K annually by replacing multiple third-party operational tools with a unified platform.

Duct Daddy

September 2024 – May 2025

Full Stack Software Engineer Contract

Remote

- Drove a 300% revenue increase within 6 months by building a custom CMS and service booking platform for a growing home services business.
- Unlocked non-technical content updates by architecting scalable content management workflows for dynamic marketing pages, blog publishing, and operational updates.
- Improved lead capture and service request flow by implementing booking and intake workflows with Next.js, Express, MongoDB, and Node.js.

Bay Valley Tech

March 2024 – September 2024

Software Engineer Intern

Modesto, CA

- Improved usability across desktop and mobile by developing reusable responsive UI components and multi-device navigation systems for a full-stack social media platform.
- Streamlined frontend development and team collaboration within an Agile environment using React, Express, MongoDB, and Node.js.
- Enabled authentication, routing, and dynamic data rendering by integrating the frontend with RESTful APIs using Axios.

PROJECTS

Lead Generation Tool

- Improved lead sourcing efficiency by approximately 70% by iterating Node.js and Express backend services around workflow automation.
- Automated local business discovery and prospect qualification by integrating Google Maps APIs into a lead generation platform.
- Accelerated real-time lead exploration and management with responsive search and filtering interfaces built in React Hooks and Context API.
